

Folio Room

A shared reading table for PDF and EPUB files.

Upload a document. Share the room code.

Everyone sees the same pages.

Turn the page with the arrows, or the keyboard.

Guests can follow the host, or read on their own.

How it works

One person opens a room and becomes the host.

They place a PDF or EPUB on the table.

The file travels browser to browser, not through a server disk.

Others join with the six-character code.

When the host turns a page, followers move with them.

Together

Read a paper, a chapter, a contract, a score.

Keep the conversation on the same paragraph.

The document stays in the browsers in this room.

Leave whenever you like. The table remains for those still here.
